Dark Blue

Puppy Wellness Exam

Congratulations on your new addition to your family! We hope you will enjoy many healthy years together. The first step to ensuring your puppy's health is this veterinary exam, performed when the puppy is very young. We recommend taking your puppy, and a fecal sample, to your personal veterinarian **within 10 days** of purchase for a follow-up exam. Parasites can pose a human health risk, so have your vet perform a fecal exam.

The exam recorded on this form, includes observation/palpation of the body systems noted below, as well as auscultation of heart/lungs. The breed listed is as described by the seller – no parentage exams were performed.

Please check with the seller on the status of vaccines and parasite deworming administered to this puppy. Your personal veterinarian will assist you in completing the required and recommended vaccines for your puppy.

Seller's Name: Chris Martin

Breed: Miniature Goldendoodle

Address: [REDACTED]
